GLOBUS Global Trade
IMPORT & EXPORT

# INDIAN SPICES, AGRICULTURAL COMMODITIES, 1121 BASMATI RICE & COFFEE

**MERCHANT EXPORTER & INTERNATIONAL TRADING COMPANY**

Direct sourcing intelligence. Buyer-led specifications. Consolidated supply. Professional global delivery.

- **INDIAN ORIGIN** SOURCING
- **BULK &** CONSOLIDATED
- **PRIVATE LABEL** PACKING
- **GLOBAL** DELIVERY

MERCHANT EXPORTER & INTERNATIONAL TRADING COMPANY

# Indian origin. International execution.

Globus Global Trade connects established producers and processors with overseas importers through one accountable commercial and export-management partner.

**ONE CONTRACT. ONE EXPORT PARTNER.**

Multiple supply sources can be coordinated, inspected, packed, documented and shipped through a single commercial relationship.

01

### SPECIFICATION-LED SOURCING

Products are quoted against grade, size, purity, crop, testing, packing, destination and shipment requirements.

02

### CONSOLIDATION ADVANTAGE

Selected products from different approved supply points can be coordinated into an efficient shipment plan.

03

### EXPORT EXECUTION

Documentation, packing, inland movement, customs coordination and freight handover are managed against the agreed Incoterm.

**DIRECT, SPECIFICATION-LED EXPORT QUOTATIONS**

Pricing is prepared from live product, grade, quantity, packing, origin, logistics and Incoterm inputs. This creates a transparent commercial offer instead of an unreliable generic catalogue rate.

**SOURCE**

India and contracted origins

**SUPPLY**

Bulk and commercial export

**PACKING**

Buyer-defined or private label

**QUALITY**

Approved specification / COA

BUYER-TO-SHIPMENT OPERATING MODEL

# How we deliver

A controlled workflow converts a buyer brief into a shipment-ready, documented export order.

## FROM PRODUCER NETWORK TO GLOBAL BUYER

We coordinate procurement, sampling, quality controls, packing, export formalities and logistics so importers can focus on distribution and market growth.

### 1 BUYER BRIEF

Product, grade, volume, packing, destination, Incoterm and timing.

### 2 SOURCE

Identify suitable producers, processors and available lots.

### 3 APPROVE

Align sample, specification sheet, tests and commercial terms.

### 4 CONTROL

Clean, grade, sort, inspect and document the selected batch.

### 5 PACK

Configure bulk, retail or private-label packing and palletization.

### 6 SHIP

Consolidate, clear for export, hand over and support documents.

**COMMERCIAL CONTROL POINTS**

Product and botanical name | origin and crop | grade and COA | quantity and MOQ | packaging and labels | port / named place | Incoterm | payment term | shipment window

20-PRODUCT EXPORT RANGE

# A portfolio built around buyer specifications

Availability, origin, crop, grade and packing are confirmed for each enquiry and written offer.

SPICES, COFFEE & AGRO EXPORTS

CHILLI & FRESH PRODUCE

PREMIUM 1121 BASMATI RICE

COFFEE & SPECIALTY SEEDS

### WHOLE SPICES & AROMATICS

01 Green Cardamom | 02 Black Pepper | 03 Star Anise | 05 Cinnamon Sticks | 08 Cloves | 13 Black Cardamom | 14 Cumin | 15 Fennel | 16 Coriander | 17 Mustard | 19 Fenugreek | 20 Kalonji

### CHILLI & FRESH PRODUCE

06 Turmeric | 07 Green Chilli | 09 Red Chilli | 10 Onion

### RICE, COFFEE & SEEDS

04 Coffee Beans | 11 1121 Steam Basmati | 12 1121 Sella Golden / White | 18 Chia Seeds

01 / SIGNATURE SPICE

# Green Cardamom

Whole Green Cardamom | Botanical: Elettaria cardamomum | Origin: India

**WHOLE GREEN CARDAMOM**

Natural colour | Characteristic aroma

### PRODUCT PROFILE

Premium aromatic green cardamom with natural colour, characteristic fragrance and strong flavour. Final appearance and sensory profile are approved against sample and written specification.

### AVAILABLE SIZE PROGRAMS

5-6 MM | 6-7 MM | 7-8 MM

### APPLICATIONS

Spice blending, beverages, confectionery, food processing, culinary and selected extract applications.

| PARAMETER | COMMERCIAL FRAMEWORK |
|---|---|
| **Product** | Whole Green Cardamom |
| **Size** | 5-6 / 6-7 / 7-8 mm, as contracted |
| **Colour** | Natural green, sample approved |
| **Form** | Whole pods |
| **Aroma** | Characteristic and aromatic |
| **Foreign matter** | As per agreed specification |
| **Moisture** | As per agreed specification / COA |
| **Packing** | Bulk or customized export packing |

WHOLE SPICES

# Black Pepper & Star Anise

Distinct aromatics for spice, beverage and food-processing applications.

02 BLACK PEPPER

## BLACK PEPPER

Botanical: Piper nigrum | Origin: India

### PRODUCT PROFILE

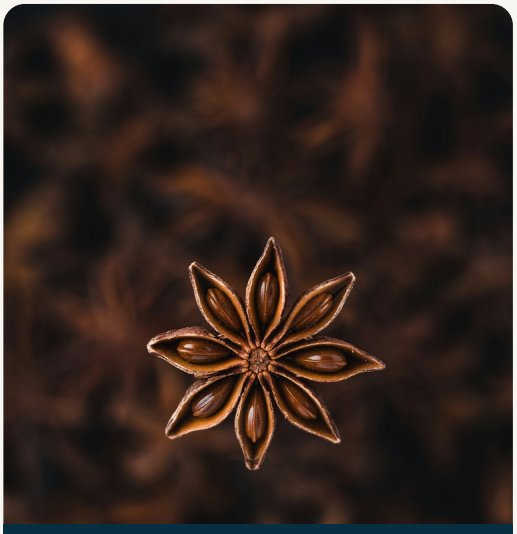

Whole black pepper with characteristic dark colour, strong aroma and pungent flavour.

### FORM / SPECIFICATION

Whole dried pepper. Density / grade, moisture, foreign matter, mould, residues and other parameters as agreed.

### APPLICATIONS

Food processing, spice blends, seasoning, sauces, foodservice and selected industrial uses.

03 STAR ANISE

## STAR ANISE

Botanical: Illicium verum | Origin: declared per written offer

### PRODUCT PROFILE

Whole dried star anise with characteristic appearance and naturally sweet, aromatic flavour.

### FORM / SPECIFICATION

Whole dried pods. Colour, broken percentage, moisture, foreign matter and packing are confirmed by specification.

### APPLICATIONS

Spice blends, beverages, confectionery, culinary products and extracts.

COFFEE & AROMATICS

# Coffee Beans & Cinnamon Sticks

Commercial ingredients for roasters, beverages, bakery and food manufacturing.

04 COFFEE BEANS

## COFFEE BEANS

Origin: India / declared per written offer

### PRODUCT PROFILE

Indian-origin or contracted-origin coffee beans for roasting, blending and commercial coffee production.

### FORM / SPECIFICATION

Green or roasted beans as agreed. Grade, screen size, moisture, defects and cup profile are buyer-defined.

### APPLICATIONS

Roasters, coffee manufacturers, cafes, beverage businesses and private-label programs.

05 CINNAMON STICKS

## CINNAMON STICKS

Botanical: Cinnamomum spp. | Origin: declared per written offer

### PRODUCT PROFILE

Naturally aromatic dried cinnamon in whole-stick form for culinary and industrial applications.

### FORM / SPECIFICATION

Whole sticks. Species, origin, cut length, colour, moisture, aroma and packing confirmed by contract.

### APPLICATIONS

Tea, beverages, spice blends, bakery, confectionery and food processing.

COLOUR & FRESH HEAT

# Turmeric & Green Chilli

Indian colour, aroma and fresh pungency tailored to destination-market requirements.

06 TURMERIC

## TURMERIC

Botanical: Curcuma longa | Origin: India

### PRODUCT PROFILE

Indian turmeric with characteristic golden-yellow colour, earthy aroma and natural curcumin content.

### FORM / SPECIFICATION

Whole / dried finger as agreed. Curcumin, moisture, foreign matter, residues and microbiology by specification.

### APPLICATIONS

Spice blends, food processing, seasoning, colour applications and selected extracts.

07 GREEN CHILLI

## GREEN CHILLI

Fresh produce | Origin: India

### PRODUCT PROFILE

Fresh Indian green chillies for foodservice, processing and fresh-produce markets.

### FORM / SPECIFICATION

Variety, size, colour, packing, shelf-life and route conditions are agreed for the destination market.

### APPLICATIONS

Fresh consumption, food processing, pickles, sauces and culinary products.

PUNGENT SPICES

# Cloves & Red Chilli

Whole-spice and processing programs with buyer-defined parameters.

08 CLOVES

## CLOVES

Botanical: Syzygium aromaticum | Origin: declared per written offer

### PRODUCT PROFILE

Dried whole cloves with strong natural aroma and characteristic pungent flavour.

### FORM / SPECIFICATION

Whole dried flower buds. Grade, moisture, headless / broken percentage, foreign matter and packing as agreed.

### APPLICATIONS

Spice blends, culinary products, beverages, bakery and food processing.

09 RED CHILLI

## RED CHILLI

Dried chilli | Origin: India

### PRODUCT PROFILE

Indian dried red chilli for whole-spice, powder, processing and spice-blending programs.

### FORM / SPECIFICATION

Whole stemmed / stemless or powder on request. Colour, SHU, moisture, aflatoxin, residues and microbiology by market.

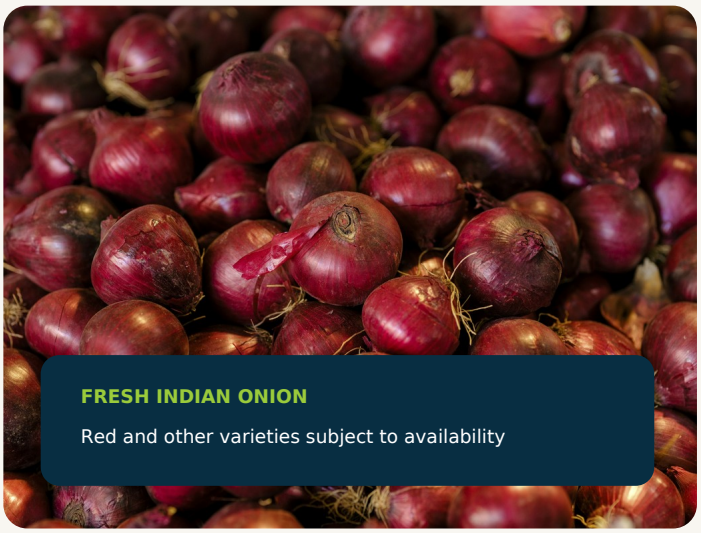

### APPLICATIONS

Whole-spice trade, chilli powder, seasoning, food processing and spice blends.

10 / FRESH PRODUCE

# Indian Onion

Fresh whole bulbs for international food markets, processing and foodservice.

**FRESH INDIAN ONION**

Red and other varieties subject to availability

**PRODUCT**

Fresh whole onion

**ORIGIN**

India

**COLOUR**

Red / contracted variety

**APPLICATION**

Fresh market, processing and foodservice

**FRESH-PRODUCE ORDER BRIEF**

Share variety, target calibre, volume, destination, packing, expected shelf-life, shipment window, cold-chain / ventilation needs and required certificates before quotation.

### VARIETY

Agreed against seasonal availability and approved sample.

### BULB SIZE

Calibre / size band recorded in the buyer specification.

### PACKING

Mesh, bag, carton, net weight and palletization as agreed.

### QUALITY

Visual defects, tolerances and lot acceptance by contract.

### SHELF-LIFE

Handling and transit plan aligned before dispatch.

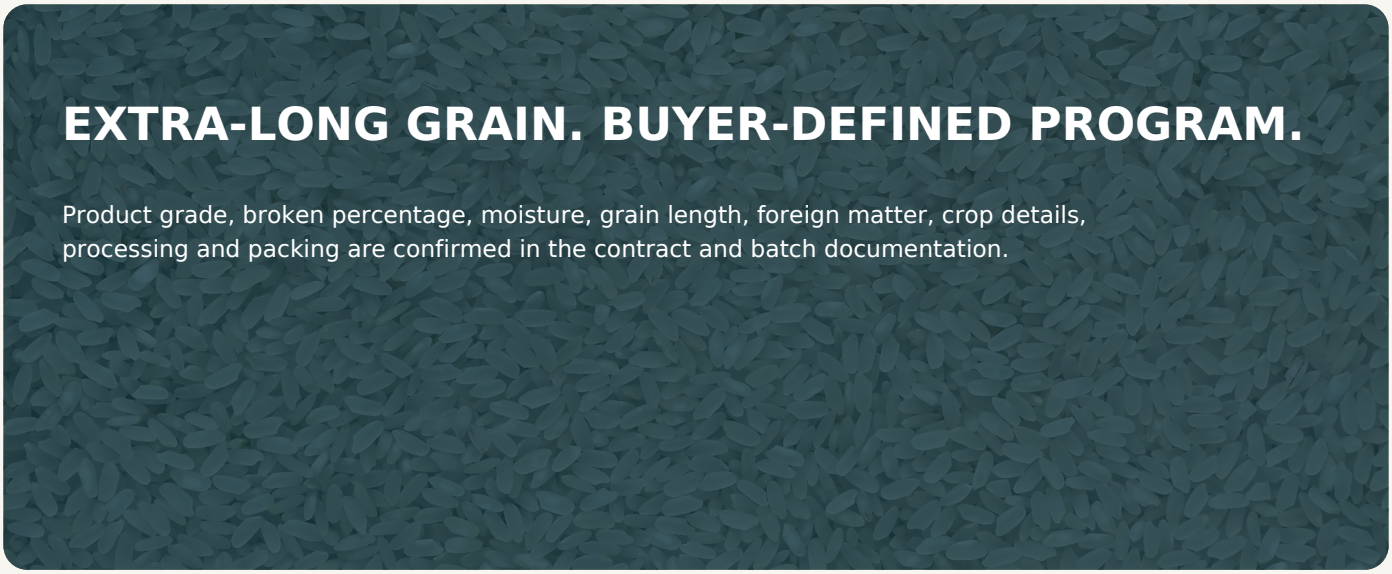

### DESTINATION

Phytosanitary, residue and import-country rules apply.

PREMIUM INDIAN RICE

# 1121 Basmati Rice

Extra-long grain programs for restaurants, catering, retail, foodservice and international rice markets.

### 1121 STEAM

Steam processed

### 1121 SELLA GOLDEN

Parboiled - golden

### 1121 SELLA WHITE

Parboiled - white

### GRAIN PROFILE

1121 extra-long Basmati variety, subject to contracted specification.

### COOKING PERFORMANCE

Processing selected for separation, texture and market preference.

### EXPORT PACKING

Bulk or private-label configuration with agreed legal marks.

### TRACEABILITY

Contract, lot, crop and batch documents aligned before release.

11-12 / RICE SPECIFICATIONS

# Steam 1121 & Sella 1121

Select processing and grade according to cooking performance, market preference and written contract specification.

## BASMATI RICE - STEAM 1121

Steam-processed 1121 Basmati retaining the characteristic long-grain appearance and aromatic profile.

### COMMERCIAL FEATURES

- Origin: India
- Extra-long Basmati variety
- Non-sticky cooked texture
- Suitable for biryani, pulao and foodservice

**CONTRACT SPECIFICATIONS**

Broken %, moisture, average grain length, foreign matter, crop, packing and test requirements are confirmed batch by batch.

## BASMATI RICE - SELLA 1121

Parboiled 1121 Basmati offered in Golden and White programs for strong grain separation and commercial cooking.

### COMMERCIAL FEATURES

- Available: Sella Golden / Sella White
- Long, slender grains
- Good cooking performance
- Suitable for catering and restaurants

**CONTRACT SPECIFICATIONS**

Broken %, moisture, average grain length, foreign matter, crop, packing and test requirements are confirmed batch by batch.

**IMPORTANT BUYER CONTROL**

Do not use generic numerical values as contractual guarantees. Final values must come from the approved specification, laboratory COA and sales contract.

WHOLE SPICES & SEEDS

# Black Cardamom & Cumin

Smoky whole pods and aromatic seeds for culinary and commercial processing.

13 BLACK CARDAMOM

## BLACK CARDAMOM

Botanical: Amomum subulatum | Origin: declared per written offer

### PRODUCT PROFILE

Dried black cardamom with a strong smoky aroma and distinctive flavour.

### FORM / SPECIFICATION

Whole dried pods. Size, colour, moisture, foreign matter and packing are agreed against the available lot.

### APPLICATIONS

Spice blends, sauces, meat preparations, rice dishes and food processing.

14 CUMIN

## CUMIN

Botanical: Cuminum cyminum | Origin: India

### PRODUCT PROFILE

Indian cumin seeds with characteristic aroma, flavour and natural colour.

### FORM / SPECIFICATION

Whole, cleaned and sorted seeds. Purity, moisture, admixture, residues and microbiology by specification and COA.

### APPLICATIONS

Spice blends, seasonings, food processing, pickles, sauces and culinary products.

14-20 / SEED PROGRAMS

# Fennel, Coriander, Mustard, Chia, Fenugreek & Kalonji

Cleaning, sorting, crop, purity and analytical requirements are aligned with the buyer specification and available lot.

REPRESENTATIVE NATURAL SEED PHOTOGRAPHY

GRADE CONFIRMED AGAINST ACTUAL LOT

### FENNEL

Foeniculum vulgare

Aromatic whole seeds for spice, bakery, confectionery and food processing.

### CORIANDER

Coriandrum sativum

Whole or split, cleaned and colour-sorted programs for commercial processing.

### MUSTARD

Brassica spp.

Brown bold / small programs for seasoning, food processing and oil extraction.

### CHIA SEEDS

Salvia hispanica

Cleaned and sorted seeds; origin, microbial and residue requirements by destination.

### FENUGREEK

Trigonella foenum-graecum

Crop and Sortex program confirmed against stock and batch documents.

### KALONJI / NIGELLA

Nigella sativa

Single or double sorting program for bakery, pickles, spice blends and seasoning.

SPECIFICATION GOVERNANCE

# Quality controlled by written evidence

A Product Specification Sheet (PSS), approved sample and/or batch-specific Certificate of Analysis (COA) can be aligned according to product, contract and destination requirements.

## PARAMETERS AVAILABLE FOR BUYER SPECIFICATION

- Product and botanical name
- Origin and crop year
- Grade and size / screen
- Purity and moisture
- Foreign matter / admixture
- Damaged or discoloured material
- Grain / broken % for rice
- Aroma and colour
- Volatile oil, where applicable
- Curcumin for turmeric
- Pungency / SHU for chilli
- Aflatoxin
- Pesticide residues
- Heavy metals
- Microbiological parameters
- GMO status, where applicable
- Radiation requirements
- Destination-country controls

## USE VERIFIED BATCH DATA

Numerical values must come from the actual laboratory COA, approved buyer specification or applicable importing-country standard. Representative catalogue values are not shipment guarantees.

1 **BUYER SPEC**

2 **APPROVED SAMPLE**

3 **BATCH TESTING**

4 **COA / RELEASE**

FLEXIBLE PACKING PROGRAMS

# Packaging engineered around destination

Packaging is customized to product characteristics, route, handling conditions, destination law and buyer requirements.

## BULK | RETAIL | PRIVATE LABEL | PALLETIZED EXPORT

Packing, markings, food-contact materials, net weight and pallet plan are approved before production.

### BULK PACKAGING

- PP / BOPP bags
- Jute bags where suitable
- Food-grade liners
- Cartons and vacuum packs
- Jumbo bags where suitable

### RETAIL / PRIVATE LABEL

- Printed bags and pouches
- Stand-up or vacuum pouches
- Buyer-branded artwork
- Destination-compliant labels
- Lot, date and legal coding

### EXPORTER-MANAGED LOGISTICS

Inland transportation | warehousing | container stuffing | freight booking | export customs clearance | carrier handover | shipment tracking

**FINAL PACKING MATERIAL, MARKS, NET WEIGHT, PALLETIZATION AND CONTAINER PLAN ARE AGREED IN WRITING.**

EXPORT ECOSYSTEM

# Trade and compliance framework

Relevant registrations, licences, certificates and destination requirements are confirmed for the actual product and shipment.

01

### APEDA

Agricultural and Processed Food Products Export Development Authority; relevant to scheduled products including Basmati rice.

02

### DGFT / IEC

DGFT administers foreign trade. The Importer-Exporter Code is a key business identifier, subject to exemptions and current procedure.

03

### FSSAI

Sets science-based food standards and regulates food manufacture, storage, distribution, sale and import in India.

04

### SPICES BOARD INDIA

Supports development and worldwide promotion of Indian spices and the development of small and large cardamom.

05

### COFFEE BOARD OF INDIA

Supports research, quality, market intelligence and promotion of Indian coffee in export markets.

06

### DESTINATION CONTROLS

Buyer-country SPS, residue, contaminant, labelling, phytosanitary, fumigation and import procedures remain shipment-specific.

**COMPLIANCE NOTE**

Reference to a public authority is informational and does not by itself imply endorsement, registration or certification. Applicable credentials and validity documents should be verified for the relevant product and shipment.

WHY GLOBAL BUYERS CHOOSE A MERCHANT EXPORTER

# Less procurement complexity. More execution control.

A professional merchant exporter is not merely an intermediary; it is the accountable coordination layer between producers, logistics providers, regulators and the overseas buyer.

01

### SINGLE POINT OF CONTACT

One contract simplifies negotiation, communication, documentation, payment and order management.

02

### CARGO CONSOLIDATION

Products from different supply points can be planned into efficient loads, reducing fragmented shipments.

03

### EXPORT DOCUMENTATION

Commercial and transport documents are prepared as a controlled set to reduce avoidable discrepancies.

04

### REGULATORY ALIGNMENT

Product, packing, labels, SPS and destination rules are reviewed before dispatch.

05

### REDUCED PROCUREMENT RISK

The exporter coordinates sourcing, supplier performance, inspection and shipment milestones.

06

### FLEXIBLE ORDER PROGRAMS

Commercial quantities and mixed-product programs can be structured around realistic supply and packing constraints.

07

### COMPETITIVE SOURCING

Multiple supply options and consolidated buying support disciplined, market-based quotations.

08

### QUALITY STANDARDIZATION

Cleaning, grading, sorting, sampling and lot verification improve consistency against the approved specification.

WHY IMPORTERS TRUST MERCHANT EXPORTERS

# Accountability beyond the purchase order

Trust is built through verifiable suppliers, agreed quality controls, transparent documents, reliable delivery coordination and support after shipment.

01

### QUALIFIED SUPPLY NETWORK

Suitable producers and processors are matched to the actual product and specification.

02

### PRE-SHIPMENT QUALITY CONTROL

Inspection, sampling and testing are agreed before dispatch, not assumed from a photograph.

03

### INTERNATIONAL TRADE EXPERTISE

Export documents, customs processes, shipping rules, Incoterms and payment structures are coordinated.

04

### DELIVERY MANAGEMENT

Procurement, production, packing, inland movement and carrier milestones are managed as one schedule.

05

### AFTER-SALES SUPPORT

Tracking, document support, claim coordination and corrective follow-up continue after shipment.

06

### CLEAR RISK ALLOCATION

Named places, responsibilities, costs and risk transfer are recorded using the agreed Incoterms rule and contract.

## MERCHANT EXPORTER VS. MULTIPLE DIRECT SUPPLIERS

| DECISION AREA | MERCHANT EXPORTER | MULTIPLE DIRECT SOURCES |
|---|---|---|
| **Contracting** | One accountable commercial partner | Separate terms and follow-up |
| **Consolidation** | Coordinated load and packing plan | Buyer coordinates combinations |
| **Quality** | One approved specification framework | Possible supplier-to-supplier variation |
| **Documents** | Controlled shipment document set | Multiple document owners |
| **Logistics** | Integrated inland and export execution | Higher buyer coordination workload |
| **Claims / support** | Centralized escalation and follow-up | Buyer pursues each party |

MERCHANT EXPORTER'S ROLE UNDER INCOTERMS 2020

# Clear costs, tasks and risk transfer

Use the exact three-letter rule, a precise named place or port, and the words Incoterms 2020 in every quotation and sales contract.

| RULE | MODE | MERCHANT EXPORTER'S DELIVERY / PRIMARY OBLIGATION | IMPORTER BENEFIT OR CAUTION |
|---|---|---|---|
| **EXW** | Any | Makes goods available at the named premises. | Maximum buyer control, but buyer carries pickup, export and logistics burden. |
| **FCA** | Any | Export clears and delivers to the buyer's carrier at the named place. | Strong choice for multimodal and containerized or consolidated cargo. |
| **FOB** | Sea / inland waterway | Loads goods on board the buyer-nominated vessel at the named port. | Buyer controls ocean freight. Normally not the best fit for container handover. |
| **CFR** | Sea / inland waterway | Pays freight to destination port; risk transfers when goods are on board at origin. | Freight arranged by seller; buyer arranges insurance and understands early risk transfer. |
| **CIF** | Sea / inland waterway | Pays freight and obtains minimum marine cargo insurance; risk transfers at origin loading. | Simpler port-to-port arrangement, but cover is minimum unless upgraded by contract. |
| **DAP** | Any | Delivers at the named destination ready for unloading. | Buyer handles import clearance, duties and taxes; seller manages main carriage. |
| **DDP** | Any | Delivers to named place and handles import clearance, duties and taxes. | Maximum convenience only where seller can legally act and comply in destination. |

**FOR CONTAINERIZED / MULTIMODAL MOVES, FCA - AND WHERE SELLER PAYS CARRIAGE, CPT OR CIP - MAY FIT BETTER THAN FOB / CFR / CIF.**

CHOOSE THE RULE AROUND THE ACTUAL HANDOVER

# The named place matters as much as the rule

Incoterms allocate delivery tasks, costs and risk. They must be combined with a complete sales contract and a realistic importer-of-record plan.

01

CONSOLIDATED CONTAINER

### FCA - named ICD, CFS, terminal or other handover point

The exporter clears the goods and hands them to the carrier at the exact named place. This aligns risk transfer with container custody.

02

SELLER-ARRANGED CARRIAGE

### CPT / CIP for multimodal; CFR / CIF for suitable sea movements

Confirm both the destination to which freight is paid and the earlier point where risk transfers. Under CIP/CIF, state any required insurance upgrade.

03

DOOR DELIVERY

### DAP or DDP - exact destination

Under DAP the buyer normally clears import and pays duties/taxes. Use DDP only after confirming the seller can legally complete destination import formalities.

INCOTERMS DO NOT REPLACE THE SALES CONTRACT

- Price, currency and payment security
- Title / ownership transfer
- Product quality and acceptance
- Force majeure, sanctions and export controls
- Governing law and dispute resolution

CONTROLLED DOCUMENTS. AGREED PAYMENT STRUCTURE.

# Trade security from order to after-sales

Professional documentation and payment discipline reduce avoidable customs, banking and commercial disputes.

### CORE DOCUMENT SET

- Commercial Invoice
- Packing List
- Bill of Lading / transport document
- Certificate of Origin
- Export customs declaration
- Phytosanitary / health / fumigation certificate, if applicable
- COA / inspection report, if agreed
- Insurance certificate under CIF / CIP, as applicable

### INTERNATIONAL PAYMENT METHODS

| | |
|---|---|
| **L/C** | Bank documentary undertaking, subject to exact compliant presentation. |
| **T/T** | Advance / balance structure agreed by contract and risk review. |
| **D/P** | Documents released against payment through banking channels. |
| **D/A** | Documents released against acceptance; higher seller credit exposure. |

Subject to transaction value, country, bank, credit and contract review.

01

### PRE-SHIPMENT

Approved specification, sample, quantity, packing, marks, tests and Incoterm.

02

### AT HANDOVER

Final documents, carrier receipt / transport record, export clearance and tracking reference.

03

### AFTER SHIPMENT

Document support, status updates, claim coordination and corrective follow-up.

### RISK-CONTROL RULE

No photograph, generic specification or Incoterm should stand alone. The sales contract should identify the goods, quantity, price, payment, quality, documents, inspection, delivery rule, claims process and governing law.

Incoterms reference: International Chamber of Commerce (ICC), Incoterms 2020. Incoterms is a registered trademark of ICC.
